

5 September 2025

To Whom It May Concern,

I am pleased to recommend Mr. Wong Wai Yin, Henry, who served as an Associate Data Scientist in Data Science Center of Excellence (DSCoE) at Orient Overseas Container Line Limited from 17 June 2024 to 7 September 2025. During his tenure, Henry was assigned to projects including optimization, chatbot application, and table understanding with large language models (LLMs).

In the bunker optimization project, Henry assumed the responsibility of project leader for a period of three months. In this capacity, he demonstrated strong leadership by effectively supervising and planning tasks for the team members, while also coordinating with developers and security teams to ensure smooth and timely deployment. As the core developer of the production optimization model, Henry conducted thorough case studies to evaluate model performance, showcasing his expertise in optimization techniques and dashboard design. Henry also developed data pipelines using PySpark to support production workflows.

Beyond his project responsibilities, Henry demonstrated strong technical initiative by introducing various tools such as Poetry/uv, GitLab CI, and pre-commit to the team. The adoption of these tools significantly enhanced our code quality, streamlined the code review process, and facilitated smoother deployment workflows. His efforts in optimizing our development practices yielded immediate and lasting benefits to the team. Notably, he also developed a generic linear optimization framework, enabling rapid integration with multiple solvers such as CPLEX and PuLP, with its potential to extend its utility to other optimization projects.

In addition to his optimization work, Henry made valuable contributions to LLM-related projects under the supervision of other team leaders. He was one of the core developers for a chatbot web application. Also, he conducted research on table understanding with LLMs, where he was responsible for designing task decomposition strategies for handling tabular data in emails.

In summary, Henry is a highly capable and dedicated data scientist whose contributions have had a measurable impact on our optimization systems and team operations. I am confident that he will bring the same level of excellence and professionalism to any future endeavor.

Yours faithfully,

Jean Du

Senior Data Scientist

Orient Overseas Container Line Limited
